Step 4 Another window will open defaulting to the Desktop. If your photo is saved to the computer's desktop, use the scroll bar to locate it. In my example Water lilies is the name of my picture.

When you select the photo the file name will appear with as the name of the picture.

Then select Open.

Step 5 Once open is selected the mini screen will disappear. Back at the permies site the title of the picture will appear to the right of the Choose File button.

A description could also be added.

Step 6 Select the Submit button.
